Education

Bachelor, KPI

September 2006 — June 2012

Junior Specialist, KPCC

September 2003 — June 2006

Programming for Computer technology and automated systems

Cover Letter

Throughout my time working on various projects, I had to work on various problems and resort to different approaches to solve them. In development I used frameworks such as Laravel, Lumen, Phalcon, Kohana. I have successfully used programming languages such as PHP(including the latest versions), JavaScript, Python. Developed both MVC projects and APIs for mobile applications and PWA applications. During the development process, I had to deploy projects on platforms such as AWS and GAE. On the projects I worked on, I had to connect third-party services such as NetSuite ERP, ClearBlade, Stripe Payments, etc.

Courses

CSS, jQuery, HTML, JavaScript, Python Core, SQL at Sololearn

Try Ruby, Try Docker, Git Real, Git Real 2, Try Django, Try Git, Try Python, Try SQL at Code School

Hobbies

At the moment, my main hobby is athletics. This hobby is the inspiration for developing two pet-projects:

- sport motivation app, based on Strava webhooks;
- voice thranslation for Zombies Run APP, using <https://elevenlabs.io/>

References

Vadym Antropov(NodeJS developer)

Very good and responsible php programmer. Develops high-loaded projects.
Senior level.

Daria Kaidalova(Front-end developer)

I worked with Vadim over 1 year on several projects. He is responsible, professional and accurate teammate. I can highly recommend Vadim as PHP developer.
